

Beamer – Maximum visual comfort for the highest demands

Adaptable projectors without spill light that master light and darkness in outdoor spaces

Beamer projectors are precision tools for the most demanding outdoor lighting tasks – technically on a par with the best museum spot-lights. With compact and corrosion-free housings, they feature exceptional quality of light, adaptivity and digital connectivity. The light emission of their innovative dark-light optics is highly uniform and without spill light. This gives the projectors maximum visual comfort and a magical appearance.

The circumstances change? Inter-changeable optics including zoom, framing and wallwash adapt to new requirements and filters and lenses serve as accessories for fine tuning. Options such as DALI, wireless dimming via Casambi Bluetooth, Tunable White and RGBW colours transform smart lighting scenarios into reality.

Structure and characteristics

The features described here are typical of products in this range. Special versions may offer additional or varying features. A comprehensive description of the features of individual products can be found on our website.

1 ERCO lenses

- Made of optical polymer
- Darklight lenses: narrow spot, spot, flood, wide flood or extra wide flood
- Spherolit lenses: oval flood or wall-wash
- Zoom lenses: zoom spot; continuously focusable
- Projection lenses: narrow framing or wide framing; continuously focusable

2 ERCO LED-module

- High-power LEDs: warm white (2700K or 3000K), neutral white (3500K or 4000K), tunable white (2700-7500K) or RGBW
- Collimating lens made of optical polymer

3 Light head

- Graphit m
- Corrosion-resistant cast aluminium, no-rinse surface treatment
- Double powder-coated
- Non-reflective safety glass

4 Housing and hinge

- Graphit m
- Coated polymer
- Optimised surface for reduced accumulation of dirt
- 90° tilt
- Internal wiring
- Dial: corrosion-resistant aluminium

5 Control gear

- Switchable, DALI dimmable or Casambi Bluetooth

6 Mounting plate

- Graphit m, coated polymer
- Rotatable through 330°

or

Connection thread G1/2

- Stainless steel
- Rotatable through 360°

Variants on request

- High-power LEDs: 3000K CRI 97 or 2700K, 3500K with CRI 92
- Housing: 10,000 further colours

Please contact your ERCO consultant.

Beamer Projectors

Darklight technology

The Darklight lens not only creates a magical impression with just one light point. It also offers precise, uniform light distribution and maximum visual comfort.

Zoom projector

The adjustable zoom light distribution allows the beam angle to be infinitely adjusted.

Contour spotlights in the outdoor area

Illuminate facades, architectural elements and logos in outdoor areas with adjustable rectangular light beams and sharp edges.

Staging with colour

Adjust the colour temperature dynamically or illuminate in colour. Luminaires with tunable white or RGBW allow for scenographic lighting concepts.

Diverse accessories

Accessories enable you to match lighting tools to special applications. Use conversion filters to shift the light colour, or change the light distribution.

Special characteristics

Efficient darklight technology

Zoom projector

Contour spotlights

Coloured light

Extensive accessories

ERCO high-power LEDs

Optical cut-off 40°/50°/60°

Different light distributions

Oval flood, freely rotatable

Different light colours

Excellent thermal management

EMC-optimised

Various construction sizes

Degree scale for good adjustability

Pivotable through 90°

Protection mode IP65

Switchable

DALI dimmable

Casambi Bluetooth

Beamer Projectors – Luminaire arrangement

Projectors

Narrow spot, Spot, Flood

An angle of inclination (α) of approx. 30° is suitable for accent lighting with Beamer projectors. This emphasises the three-dimensions of architectural details, sculptures and trees without distorting the spatial impression with excessive shadowing.

Arrangement: $\alpha = 30^\circ$

Zoom projectors

Zoom spot

Zoom projectors feature a continuously adjustable beam angle. With the spot to wide flood zoom range, smaller objects can be accentuated effectively at an inclination angle (α) of approximately 30° . The object is modelled without distorting the effect as a result of excessive shadowing. It also prevents shadows cast by the observer.

Arrangement: $\alpha = 30^\circ$

Contour spotlights

Narrow framing, Wide framing

Contour spotlights allow for freely adjustable light beams to illuminate facades, logos or paintings in outdoor areas with sharp contours and without colour gradients. Select narrow framing to accurately illuminate small areas from a long distance and wide framing to accurately illuminate large areas from a short distance.

Floodlights

Wide flood, Extra wide flood, Oval flood

Beamer projectors ensure uniform floodlighting of wall surfaces or trees. The ideal angle of tilt (α) for this is approximately 30° .

Arrangement: $\alpha = 30^\circ$

Beamer Projectors – Luminaire arrangement

Lens wallwashers Wallwash

Outdoors, uniform vertical lighting defines spatial borders. The distance to the wall (a) of Beamer wallwashers should be around one third of the wall height (h) for this purpose. This results in an angle of tilt (γ) of approx. 55°.

Arrangement: $a = 1/3 \times h$ or $\gamma = 55^\circ$

For good longitudinal uniformity, the luminaire spacing (d) of Beamer wallwashers may be up to 1.5 times the distance to the wall (a).

Arrangement: $d \leq 1.5 \times a$

Optimal wall distances and luminaire spacing values for individual products are specified in the wall-washer tables at www.erco.com.
